

# presentation

## Accurate, affordable genotyping with the next evolution of PCR

### Presenter

**Mitch Gore**

Field Applications Manager

### Date

Tuesday, June 12, 2018

**Breakfast Seminar**  
Seminar from 7-8am

### Location

Forum Foyer/Canada Room

### Contact

Bob Setter

## rhAmp™ SNP Genotyping System

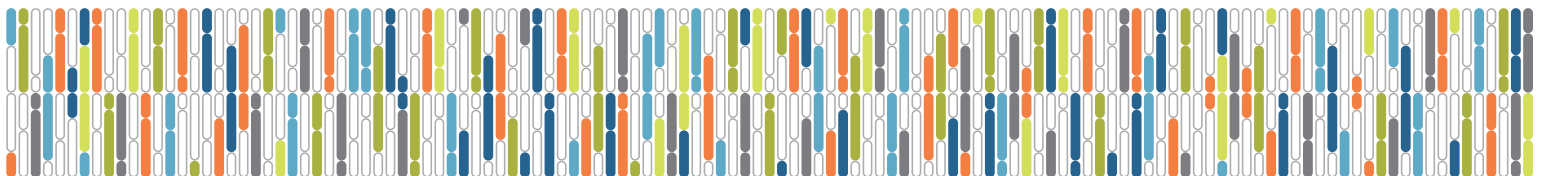

Improve the precision of your PCR-based SNP genotyping with rhAmp SNP Genotyping technology. This technology uses a unique two-enzyme system coupled with RNA-DNA hybrid primers to precisely interrogate target SNPs. Combined with IDT universal reporter chemistry, the rhAmp SNP Genotyping System offers a simple, high performance genotyping solution at an affordable price.

The rhAmp SNP portfolio includes all components needed to successfully generate high quality genotyping data on any commonly available real-time PCR instrument.
